

JAVASCRIPT BASIC ASSIGNMENT - 1

1. Create two integer variables (a and b) after that assign value for them. Then swap value of a and b and display to the screen.

Hint: Using a c variable to transfer value temporary.

2. Write a program to input three numbers as math, physics, and chemistry. Output average and rank according to the following:

AVG	Rank
≥ 8.0	A
≥ 6.5	B
≥ 5.0	C
< 5.0	D

Hint: Declare average and rank variable and calculate value for them.

3. Write a program to find x from $ax + b = 0$ equation with a and b are input from keyboards.
4. Write a program to find x from $ax^2 + bx + c = 0$ equation with a and b are input from keyboards.
5. Write a program to calculate sum of first 50 integer number.
6. Write a program to print to screen first 20 numbers of Fibonacci numbers.
